

GigaPOF[®] -TL-KITLD

Toolkits for crimp-on connector installation

Complete kits for field installation of GigaPOF[®] crimp-on connectors.

Our LD-series connectors and tool-kits are by far the world's simplest optical fiber connector system. No optical fiber experience is needed to install multi-gigabit optical links in the field.

Fast, simple field termination of multi-gigabit optical links

These toolkits make field installation of GigaPOF[®] cables simpler than that of copper data cables. With **just two crimps**, one on the connector sheath and one on the tip of the ferrule, these tools permanently attach our industry-standard connector types to premise cables. **No adhesives or index-matching gels** are required, and the entire process takes less than a minute. **No special training** is needed, and even experienced optical fiber technicians will appreciate the speed, simplicity, and compact toolkit.

Features and applications

- » Much faster and simpler than field-installation methods for glass fibers or copper data cables. Can be used by personnel with no previous optical fiber experience
- » Lower kit and connector cost than field-installable connectors for glass fiber
- » No more glass fiber shards poked into fingertips
- » Connector crimps on to fiber, no adhesives or gels required
- » For large installations, consider fast, automated polishing using termination machine GigaPOF-TL-MM.

KITLD includes a stripper, a swaging crimper, a pair of shears, a nipper, a polishing disc, polishing papers, a polishing pad, and a zipperable bag.

Installation instructions available at:
For LC: www.chromisfiber.com/LCconnector.php
For SC: www.chromisfiber.com/SCconnector.php

Kit Models and Tools

Kit/Tool Part Number	Form Factor	Compatible Connectors *	Compatible Cables	Description
GigaPOF-TL-KITLD-LC	LC	GigaPOF-CN-SLC-LDCR (simplex) GigaPOF-CN-DLC-LDCR (duplex)	All LD-series premises simplex and duplex zipcord cables	Complete tool kit for field-installing LC crimp-on connectors
GigaPOF-TL-KITLD-SC	SC	GigaPOF-CN-SSC-LDCR (simplex) GigaPOF-CN-DSC-LDCR (duplex)		Complete tool kit for field-installing SC crimp-on connectors
GigaPOF-TL-SWCR-LDLC GigaPOF-TL-SWCR-LDSC	LC SC	As above		LC or SC swaging crimp tool only

* Connector information available at: www.chromisfiber.com/connectors.php
